DETAILED ACTION

1. Applicants' arguments and amendments, filed September 18, 2009, have been fully considered and they are not deemed to be persuasive. The following rejections are reiterated and modified as necessitated by amendment. They constitute the complete set presently being applied to the instant application.

Status of the Claims

Claims 84-87 and biomarker WM-447 are under examination.

Claims 1-83 and 88-102 are withdrawn.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: the label of "Figure 1C" is missing from the drawings. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 84-87 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Applicants have amended the claims to a "computer-readable medium". Given that the specification does not specifically define a "computer-readable medium", the term is interpreted to also include carrier waves. However, carrier waves are non-statutory *per se*. Thus, the instant claims are non-statutory.

Response to Arguments

5. Applicants have responded to this rejection by amending the claims and presenting arguments. The amendments are addressed above. Previously, the instant claims had been rejected as solely drawn to a computer program, which is non-statutory *per se*, and for not having a useful, concrete, and tangible result. Applicants have amended the claims to address the rejection based on the rationale that the instant claims are solely drawn to a computer program. Applicant also argued that the inquiry into whether the instant claims have a useful, concrete, and tangible result is

Art Unit: 1631

insufficient. The Examiner has withdrawn the rejection based on whether the instant claims have a useful, concrete, and tangible result.

This rejection is maintained and modified as necessitated by amendment.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
